Education

Mensa Gymnázium Graduating 2027

Extracurriculars

- Participating in FIKS (CTU Prague) and KSP (Charles University)'s programming seminaries

Programming AG Student, Student Trainee Center Microsoft July 2025 – Present

two-year development program for high school students

- Completed Azure training, certifications, and an individual technical project
- Took part in multiple internal hackathons, working across back-end and front-end roles
- Participated in a Microsoft Garage hackathon, contributing to an Android-native AI project

Technical Experience

Backend developer, STEM-HUB July 2025 – Present

Student organization, non-profit

- built a lightweight content management backend system under time constraints to replace an outdated site
- Designed and developed a CRUD API in Go with minimal dependencies
- Integrated backend with an existing frontend, including refactoring and adapting Angular front-end despite no prior Angular experience

Projects

Resume Skill Extraction and Matching System (school Mini-thesis Project) github repository

Python, Machine Learning, Azure Functions

- Created and labeled a custom dataset (~2000 resumes) by utilising open-source data, LLM-assisted batch labeling, and manual review
- Trained and evaluated CNN- and transformer-based NER models using NumPy and SpaCy python libraries
- Deployed a batch API using Azure Functions and Azure translator to handle non-English input
- Designing an extension to evaluate extracted data by matching against a vector database based on EU's Skills and Occupations dataset
- Designing a .NET Blazor front-end to display individual statistics

Drink Price Comparison Website live site

Python (flask), Postgres

- Built a web application (SSR) displaying discounted caffeinated beverages across Czech grocery chains
- Implemented a low-load update pipeline via web scraping (BeautifulSoup)
- Setup database deployment and scheduled weekly jobs aligned with store sale cycles to update site prices

Skills

Languages

- Primary: C#, python
- Secondary: Go, Kotlin
- Familiar: C, C++, JavaScript

Technologies & Tools

- Linux, Bash, Git, PostgreSQL
- Azure
- Jetpack Compose (Android)

Certifications

Azure fundamentals (AZ900)
